

The Haddonfield American Legion is pleased to welcome two new partners who can provide adjunct services to our veterans.

The Haddonfield American Legion Post 38 is pleased to join with Eunohealth, a Non-Profit organization focused on mental health for veterans struggling with PTSD and Trauma.

More than 7% and up to 15% of our veterans suffer from PTSD. Nearly 30% who served in conflicts like Vietnam, Afghanistan and Iraq struggle with PTSD. Common causes include combat exposure, sexual trauma and training accidents. Aside from being treated by the VA, be advised Eunohealth is available to help you throughout your journey.

Welcome to [Euno Health](#), a mental health platform for veterans, service members, and their families in Greater Philadelphia.

We're also pleased to welcome ONCORG, an oncology organization focused providing resources to those during their survivorship journey.

About 55,000 veterans are diagnosed with cancer annually in the VA System. Some of their military related cancers are exposure to Agent Orange, burn pits and various forms of radiation. We know the PACTAct benefits help support veterans with cancer. However, ONCORG is here to provide additional resources and services if you need them.

Veterans are 50% more likely to have cancer than the general population. Some of your cancer may be unrelated to your time in service. ONCORG can help you find treatment centers, research centers, or maybe you just want to share your survivorship stories.

Veterans are encouraged to utilize their VA benefits for screenings and to connect with, and for, care, especially if they believe their illness is related to environmental hazards, while in service.
